

DIARY  
1866

The image shows the front cover of a diary. The cover is a dark green color with a fine, repeating diamond-shaped or grid-like texture. A dark, possibly black or dark brown, strap runs vertically down the center of the cover. On the right side, there is a gold-colored emblem. The emblem is roughly circular with a decorative, scalloped border. Inside the circle, the word "DIARY" is written in a serif font at the top, and the year "1866" is written at the bottom. In the center of the circle is a sunburst or starburst design. The cover shows signs of wear, with some scuffing and discoloration, particularly along the edges and where the strap is attached.

A horse-power is the power that will raise 33000 lbs. one foot high in each minute; 33000 lbs. of water falling one foot in each minute exerts one horse power -

To get the horse power of a stream multiply the number of cubic feet which flow in a minute by  $62\frac{1}{2}$  & by the height of the fall in feet & divide by 33000
